Industrial Internship Report

FALL SEMESTER 2025-26

Type of Intern: Tick the applicable	Industry (offline)	CDC Course ☒	VIT-TBI	VAC
Course Details				
Course Code	BCSE399J	Course Name	Summer Industrial Internship	
Student Details				
Name of the Candidate	Ridanshi Agarwal		Reg. No.	23BCI0026
Programme	Btech	Branch	CSE – Spl. Information Security	
Email id	ridanshi.2023@vitstudent.ac.in		Mobile	9509294456
Intern Details				
Title of Intern / Course Name /VAC name	Oracle Generation AI			
Name of the Company / Platform / School	Oracle			
Location (if applicable) Online platform / VAC location	Online Platform of OCI			
Website / Source Link	www.oracle.com			
Duration	From Date	20/05/25	To Date	10/07/25

Proof(Certificate) of Completion			
Issuing Authority / Supervisor Details	N.Krishnamoorthy (Oracle)		
Certificate ID / Number	Testing ID: OC6333850 PASS		
Date of Issuance	2 July 2025		
Email (Authority)	krishnamoorthy.nagarathinam@oracle.com	Mobile	9500039879

Brief About the Internship

During this internship, I mainly worked with Oracle Cloud Infrastructure (OCI) and its Generative AI tools. The program focused on both the **AI Foundations Associate** and **Generative AI Professional (1Z0-1127-25)** certifications. My role involved exploring OCI's AI and ML services, understanding how large language models (LLMs) function, learning prompt engineering, and building generative AI workflows using OCI's pre-trained and customized models.

Through hands-on exercises, I gained practical knowledge of Retrieval-Augmented Generation (RAG) pipelines, embeddings, AI clusters, and agent deployment. The program enhanced my understanding of cloud-based AI integration, data security, and ethical AI practices.

One challenge I faced was improving model performance within OCI's system. I tackled this through repeated testing and studying the available documentation.

Overall, the internship gave me a strong mix of theory and practical experience, improved my technical confidence, and helped me complete both Oracle certifications successfully, preparing me for future AI-based development work.

Skills Obtained During the Internship

Throughout the internship, I built a solid foundation in cloud-based AI deployment, large language models, prompt engineering, and RAG pipelines using Oracle Cloud Infrastructure. I gained hands-on practice in setting up AI clusters, using OCI's generative AI tools, and fine-tuning pre-trained models for specific requirements.

Besides technical learning, I improved my **analytical thinking**, **problem-solving**, and **documentation** skills through constant testing and optimization. The program also boosted my communication and self-learning abilities, as I often worked through Oracle's structured materials independently.

Overall, I strengthened my ability to design and integrate AI models safely within cloud environments.

Feedback and Suggestions:

The OCI Generative AI internship provided a good balance between theory and hands-on learning. The structured lessons, interactive content, and detailed Oracle documentation helped make tough topics like LLMs and fine-tuning easier to understand. The flexible, self-paced setup also made it convenient to learn while practicing in real time.

To make it even better, the program could include **guided projects** or **live mentorship sessions**, especially for beginners. Adding **real-world examples or case studies** showing how companies use generative AI would also make the training more practical and engaging.

Overall, it was a valuable learning experience that built my foundation in Oracle's AI technologies and earned me globally recognized certifications. With a few improvements in mentorship and project guidance, it could become even more effective for future students.

Signature of the Student: RIDANSHI AGARWAL

Date: 25th October 2025

(Specimen of Bonafide/ Completion Certificate)

Completion Certificate

Include the certificate of completion. For CDC courses, include the scorecard also.

Oracle Testing ID: OC6333850

1Z0-1127-25 - Oracle Cloud Infrastructure 2025 Generative AI Professional

Exam Date: 02-JUL-2025

Registration: 83591a7c-b75e-480d-835d-d58e99617ec1

Your Score: 84%

Passing Score: 68%

Result: Pass

Feedback on your performance is printed below. The report lists the objectives for which you answered a question incorrectly.

Create embeddings of chunks using OCI Generative AI service
Design and use prompts for LLMs
Explain RAG and RAG workflow
Explain the fundamentals of OCI Generative AI Agents service
Fine-tune base models with custom dataset
Store and index embedded chunks in Oracle Database 23ai

Day-to-Day Activity Diary – OCI Generative AI Internship (May–July 2025)

Week 1 (20–25 May): Started with the AI Foundations module, learning about AI basics, different types of tasks, data management, and how AI, ML, and DL differ. Took part in a hands-on demo to understand the basics better.

Week 2 (26–31 May): Learned about the fundamentals of Machine Learning including supervised, unsupervised, and reinforcement learning. Practiced ML exercises using Jupyter Notebooks.

Week 3 (1–7 June): Studied Deep Learning concepts such as convolutional and sequence models. Tried classification examples using multilayer perceptrons in demos.

Week 4 (8–14 June): Focused on Generative AI and LLMs, learning about transformers, prompt design, and customizing LLMs with specific data.

Week 5 (15–21 June): Explored OCI's AI Portfolio, including ML services, infrastructure, GPUs, and ethical AI ideas like responsible usage.

Week 6 (22–26 June): Worked practically with OCI Generative AI tools, vector search, and the Select AI feature.

Week 7 (27 June–4 July): Learned about AI applications in language, speech, vision, and document comprehension through demos.

Week 8 (5–10 July): Wrapped up with assessments covering all modules: AI basics, ML, DL, Generative AI, and OCI service usage to review and test overall understanding.
